This report is built from MAZAL's live storefront — its quiet-luxury design system, modest-fashion catalogue (abayas, kaftans, dresses, modest wear, throws, scarves & accessories), AED pricing, the **STILL10** first-order incentive, complimentary delivery over AED 500, WhatsApp concierge, and 4.9★ social proof. Every example is written to be copied, edited, and used.

Executive Summary

MAZAL enters the market as a **quiet-luxury modest-fashion house** — abayas, kaftans and scarves designed with the restraint of a maison and the warmth of home. The brand promise is captured in one word: *Still*. The 90-day goal is not loud discounting; it is to build a **recognisable, premium, trust-rich brand** that converts a warm Gulf audience into first orders and repeat clients.

The Objective

Launch MAZAL, reach the first **1,000 engaged followers** per core channel, capture **2,000+ emails/WhatsApp opt-ins**, and land the **first 150–300 orders** in 90 days.

The Strategy

Editorial organic content (IG + TikTok led), a tight influencer seeding program, retargeting-first paid ads, and a concierge retention loop via WhatsApp & email.

The Edge

A genuinely beautiful storefront, a clear point of view ("still elegance"), AED-native trust signals, and modest-luxury positioning that is under-served at this quality level.

90-Day Targets at a Glance

Metric	Month 1 (Launch)	Month 2 (Traction)	Month 3 (Scale)
Instagram followers	1,500	4,000	8,000
TikTok followers	1,000	5,000	12,000
Email / WhatsApp list	800	1,800	3,500
Website sessions / mo	8,000	20,000	45,000
Orders	40–60	70–110	120–180
Conversion rate	0.8–1.2%	1.3–1.8%	1.8–2.5%
Avg. order value (AOV)	AED 1,150	AED 1,250	AED 1,350

Targets assume the Standard budget (Section 23) and a launch catalogue led by the Sukoon, Layl & Noor abayas, Hawa & Dhahab kaftans, and the Hams & Thuraya scarves. Adjust upward on the Growth budget.

Where to Focus First

- Instagram + TikTok are the engine.** 70% of organic effort goes here — this is where a Gulf modest-luxury audience discovers and trusts brands.
- Seed 15–25 micro-influencers** before spending heavily on ads; their content becomes your ad creative.
- Capture every visitor** into WhatsApp/email with STILL10 — paid traffic is wasted without retention.
- Spend paid budget on retargeting first**, prospecting second.

Brand Positioning

Positioning Statement

For the modern Gulf woman who values **calm, considered elegance**, MAZAL is a quiet-luxury modest-fashion house that designs abayas, kaftans and scarves **made to endure** — never trend-led, always timeless. Unlike fast modest-fashion and loud logo brands, MAZAL sells **stillness**: fluid silhouettes, warm neutral tones, and pieces worn and worn again.

Brand Pillars

- **Still / Calm** — "MAZAL means Still." Restraint over noise.
- **Craft** — hand-finished seams, considered to the last stitch.
- **Endurance** — "designed to endure," anti-fast-fashion.
- **Warmth** — Gulf hospitality, the warmth of home.
- **Modesty as power** — "Modesty shaped by craft, worn with quiet confidence."

Brand Voice

- Editorial, unhurried, warm — never salesy or shouty.
- Short, poetic lines. Lots of white space.
- Bilingual-ready: English with tasteful Arabic accents (الأناقة في السكون).
- Avoid: "SALE!!!", emojis-as-noise, urgency spam.
- Prefer: "An edit of quiet statement pieces."

Visual Identity (from the live site)

The strategy must stay visually consistent with the storefront so paid and organic feel like one brand.

Token	Value	Use in content
Blush cream 	#FDF7F3	Backgrounds, story frames, email base
Champagne / sand 	#F0D6CA	Cards, secondary banners
Warm rose-beige 	#CDB0A5	Accents, dividers
Rose-mauve (accent) 	#C2887A	Buttons, links, highlights, CTAs
Cocoa / espresso (text) 	#46352E	Headlines, body copy

Type: high-contrast serif display (Cormorant-style) + clean sans body. **Motifs:** satin/silk textures, marble & warm-stone interiors, the M-Z monogram, generous negative space, 16–20px rounded corners.

Audience Insights to Exploit

Insight	Marketing implication
Modesty + luxury rarely meet at this design quality	Lead with editorial imagery; own "quiet luxury, modestly."
Gulf calendar drives demand (Ramadan, Eid, National Day, wedding season)	Build campaign tentpoles around these; pre-launch the edit 3–4 weeks early.
WhatsApp is the default commerce channel in the Gulf	Make WhatsApp concierge a hero, not a footnote.
Tabby / Tamara BNPL expected at this price	Surface "4 interest-free payments" on PDP & ads.
Arabic + English shoppers	Bilingual captions; mirror layouts for RTL.

- ☐ Bilingual, Gulf-native voice and calendar.

Launch Strategy — 3 Phases

Phase 1 • Days 1–30 — “The Veil Lifts” (Awareness & Trust)

- Seed 15–25 micro-influencers with hero pieces.
- Launch teaser → countdown → "now open" sequence.
- Turn on retargeting only; collect emails with STILL10.

Phase 2 • Days 31–60 — “Considered” (Traction & Conversion)

Goal: convert the warm audience; find 2–3 winning ad creatives; scale what works.

- Introduce prospecting ads using best influencer/UGC content.
- Run the first campaign tentpole (e.g., "The Abaya Edit").
- Launch the Rewards / referral loop & WhatsApp broadcast list.
- Begin weekly email; start "complete-the-look" cross-sell.

Phase 3 • Days 61–90 — “Worn & Worn Again” (Scale & Retention)

- Scale winning ad sets; add lookalike audiences.
- Run a signature campaign with 1 macro + 5 micro influencers.
- Push bundles (abaya + scarf + belt) & gifting.
- Formalise UGC pipeline; first customer-photo gallery live.

Section 11 • Facebook Strategy

Facebook is **less for organic reach, more for infrastructure**: it powers Meta Ads, Shops, reviews, and an older/expat & gifting audience.

- **Use for:** Meta Ads engine, Facebook/Instagram Shop & catalogue, Messenger + WhatsApp click-to-chat ads, Groups (modest fashion / Gulf expat communities), reviews.
- **Post 2–3×/week** — repurpose IG content; longer captions & albums work here.
- **Community:** a "MAZAL Majlis" group for VIPs, styling Q&A, early access.

- **Don't** over-invest organic time; treat it as the ad backbone.

- Evergreen searchable titles: "How to Style an Abaya 3 Ways," "What to Wear for Eid 2026," "Modest Outfit Ideas — Quiet Luxury."

Section 13 · Threads / X Strategy

Optional, low-effort. Useful for **brand voice, community and customer care** — not a primary sales driver. Worth it on Threads for the fashion community; X mainly for support & reposting press.

- 3–5 posts/week: short brand musings, behind-the-scenes, polls, restock alerts.
- Repurpose caption lines & "did you know" craft facts.
- Engage modest-fashion creators & reply fast to questions.

THREADS POST

we named her Sukoon — it means "stillness." an abaya cut for quiet movement, made to be worn and worn again.

Verdict: include Threads (yes, low effort), keep X for service + PR only.

Paid Ads Strategy

Principle: **retargeting before prospecting**. Warm traffic (site visitors, engagers, list) converts cheapest. Only scale prospecting once you have a winning creative and a working retention loop.

Budget Flow by Phase

Phase	Retargeting	Prospecting	Primary objective
Month 1	80%	20%	Catalogue sales / engagement; build pixels
Month 2	55%	45%	Test 3–5 creatives; find winner
Month 3	40%	60%	Scale winners + 1% lookalikes

Channels & Roles

Platform	Use	Audience
Meta (IG/FB)	Core: catalogue + creative testing	Retarget → interests (modest fashion, luxury, Gulf) → lookalikes
TikTok Ads	Reach + Spark Ads on winning organic	Broad + creator-content lookalikes
Pinterest Ads	High-intent shopping pins (M2–3)	Keyword + actalike
Snapchat Ads	Retargeting + younger Gulf	Pixel audiences
Google (Search/PMax)	Capture brand + "luxury abaya" demand	Branded + non-brand + Shopping

Influencer Strategy

Influencers are MAZAL's fastest path to trust in the Gulf. Strategy: **seed many micro creators (gifting) → amplify the best with paid + Spark Ads.** Their content becomes your ad library.

Brief & Tracking

- Give a 1-page brief: 3 key messages, do/don'ts, hashtags (#MAZAL #ModestLuxury), tag + STILL10/affiliate code.
- Ask for usage rights (organic + paid) in the agreement — essential for Spark Ads/boosting.
- Track via unique codes/links; log reach, saves, sales, CPA per creator in a sheet.

Website Conversion Suggestions

The storefront is already beautiful and trust-rich (4.9★/1,800+, free-shipping bar, WhatsApp, wishlist, reviews, quick-add). These tweaks lift conversion without redesigning anything.

#	Suggestion	Why it lifts conversion	Priority
1	Add Tabby/Tamara BNPL messaging on PDP & cart ("4 interest-free payments of AED X")	Expected at this price in the Gulf; raises AOV & conversion	High
2	Show STILL10 capture as a timed pop-up / sticky bar for new visitors	Converts traffic into list before they bounce	High
3	Surface delivery time + free-over-AED-500 on every PDP	Removes the #1 hesitation	High
4	Add a size guide + "fits true / model wears" note + WhatsApp "ask about fit"	Cuts returns & hesitation on abayas	High
5	Real customer-photo gallery & verified reviews on PDP	Social proof is the top trust driver	Med
6	Bundles / "complete the look" (abaya + scarf + belt) with a small saving	Lifts AOV; the logic already exists in the catalogue	Med
7	Low-stock & "back in stock" alerts (Layl, Dhahab are limited)	Urgency + captures demand	Med
8	Express/Apple Pay one-tap checkout ; guest checkout	Reduces mobile drop-off	High
9	Add Arabic toggle (RTL is already structured)	Doubles addressable audience	Med
10	Trust row at checkout: secure pay, easy returns, WhatsApp help	Last-mile reassurance	Med

Measurement: set up GA4 + Meta/TikTok pixels + a heatmap (Clarity/Hotjar) before driving paid traffic, so every dirham is attributable.

Metrics & KPIs to Track

North-Star & Guardrails

Category	Metric	Healthy target (by M3)
Acquisition	Website sessions / mo	40k–50k
	Cost per click (Meta)	AED 1.5–4
	New followers / mo (IG+TT)	6k–10k
Conversion	Store conversion rate	1.8–2.5%
	Add-to-cart rate	6–9%
	Checkout completion	> 45%

Retention	Email list growth / mo	1,200+
	Repeat-purchase rate	> 20%
	Email revenue share	25–35%
Brand	Engagement rate (IG)	> 4%
	UGC pieces / mo	30+

Realistic KPI Ranges

Use these as planning ranges, not guarantees. Conservative assumes limited spend and founder-led content. Standard assumes consistent posting, micro-influencer seeding, and modest ads. Aggressive assumes strong creative performance and a larger paid/influencer budget.

Metric	Conservative by M3	Standard by M3	Aggressive by M3
Website sessions / month	8k-15k	20k-35k	40k-60k
IG + TikTok follower growth / month	1k-3k	3k-7k	8k-15k
Store conversion rate	0.8-1.3%	1.4-2.0%	2.0-2.8%
Add-to-cart rate	3-5%	5-8%	8-10%
Average order value	AED 950-1,150	AED 1,150-1,350	AED 1,350+
Blended ROAS	1.2-1.8x	2.0-3.0x	3.0x+
Customer acquisition cost	AED 180-280	AED 100-180	< AED 120
Email / WhatsApp list growth / month	300-700	800-1,500	1,500+
Repeat-purchase rate	5-10%	10-18%	20%+
UGC pieces / month	5-12	15-30	30+

Reporting Cadence

- **Daily:** spend, ROAS, orders, top content (5-min glance).
- **Weekly:** one-page scorecard vs. targets; 1 winner, 1 fix.
- **Monthly:** full funnel + cohort + influencer CPA review.

Tools: GA4, Meta & TikTok Ads Manager, the email platform's analytics, a simple Google Sheet master scorecard, and Microsoft Clarity for free heatmaps/recordings.

Budget Options (Monthly, AED)

Three tiers. Start Lean to learn, move to Standard once a creative wins, scale to Growth when ROAS holds. Figures are monthly and indicative.

Line item	Lean	Standard	Growth
Paid ads (Meta/TikTok/Google/Snap/Pin)	3,000	10,000	28,000
Influencer (gifting + paid micro/macro)	2,000	6,000	18,000
Content production (shoots, editing)	1,500	4,000	9,000
Tools (email, scheduler, heatmaps, apps)	500	1,200	2,500
Promotions (STILL10, referral, gifting)	1,000	2,500	6,000
Contingency / testing	500	1,300	3,500
Total / month	8,500	25,000	67,000

Allocation Principle

● Paid ads ~40% ● Influencer ~25% ● Content ~16% ● Promos ~10% ● Tools/Contingency ~9%

90-Day Indicative Spend

Tier	Month 1	Month 2	Month 3	90-day total
Lean	8,500	8,500	10,000	27,000
Standard	20,000	25,000	30,000	75,000
Growth	45,000	60,000	67,000	172,000

Rule of thumb: don't scale ad spend faster than ROAS & fulfilment can hold. Reinvest email/WhatsApp-driven profit into content & influencers — the cheapest long-term growth.

Final Priority List

If you do only these, in this order, MAZAL launches well.

Do first (Week 0–1)

- ☐ Replace site placeholders (WhatsApp, reviews link, socials, domain) & install GA4 + all pixels.
- ☐ Lock the brand kit + secure all @mazal handles + set up shoppable profiles.
- ☐ Shoot & batch 20–30 pieces of launch content (editorial + UGC-style).
- ☐ Build the welcome + abandoned-cart flows; open the WhatsApp concierge.
- ☐ Line up 15–25 micro-influencers to post on launch day.

Do next (Weeks 2–4)

- ☐ Run the "Veil Lifts" launch sequence across IG + TikTok + Snap + email + WhatsApp.
- ☐ Turn on retargeting ads; capture every visitor with STILL10.
- ☐ Publish daily; reply to everything within 2 hours.
- ☐ Add BNPL (Tabby/Tamara) messaging + delivery info to PDPs.

Then scale (Weeks 5–12)

- ☐ Find & scale one winning ad creative; add prospecting + lookalikes.
- ☐ Launch Rewards/referral + the "Abaya Edit" & signature campaigns.
- ☐ Build the UGC + review engine; open the VIP "Majlis" tier.
- ☐ Review KPIs weekly; reinvest retention profit into content + influencers.

The One-Sentence Strategy

Build a beautiful, trusted brand world on Instagram & TikTok, seed it through micro-influencers, capture every visitor into WhatsApp & email, and let retargeting and retention — not discounts — turn “still” into sales.
